# WELCOME ADDRESS

**Dear students, dear exhibitors,**

In today's world, the labor market is experiencing a shortage of specialized experts – a phenomenon gaining nationwide attention. This lack of up-and-coming talent is a decisive factor limiting the growth and prosperity of many companies in Germany. It has become more and more difficult for qualified talent and specialized companies to find one another. The Jacobs Career Fair offers a mutual solution for both challenges; it is a place where companies and specialized talent have an opportunity to come into direct exchange. Companies have the chance to meet highly motivated, curious and internationally oriented young individuals – whilst our students have the opportunity to get in touch with companies and organizations from a wide variety of size, sector, and work area.

Students at Jacobs University enjoy an outstanding, interdisciplinary education on a diverse campus of more than 100 nationalities. They are equipped with a broad, yet solid, expertise in their respective fields, paired with leadership and intercultural skills. In a rapidly changing working environment, characterized by digitization and globalization, they see challenges and engage in solving them. These skills and competences make Jacobs students very attractive for employers.

Now in its fifth year, the Jacobs Career Fair has established itself as a successful and popular networking platform. Internationally oriented enterprises, start-ups, regional companies, non-profit organizations, and research institutions present themselves every year. The program offers various workshops and sessions on career-related topics. Experienced experts from the human resources area, as well as numerous alumni of Jacobs University, provide first-hand insights and answer questions about application strategies, entrepreneurship, and labor market needs.

Our Career Fair is a land of opportunities – for students, graduates, and employers alike. I am confident that you, dear students and exhibitors, will find what you are looking for.

Best regards,

A handwritten signature in black ink, appearing to be 'MH', written in a cursive style.

Prof. Dr. Michael Hülsmann

**Janina Marahrens-Hashagen**

President of the Bremen Chamber of Commerce –  
IHK for Bremen and Bremerhaven

---

## WELCOME ADDRESS

Knowledge and innovation are the basis for the future viability of Bremen's economy. With the complexity and pace of change in the global workforce, small and medium-sized enterprises face the challenges of maintaining and expanding their innovation and competitiveness.

In their innovation efforts, companies can draw on an excellent network of science and research facilities here in Bremen. Above all, they benefit from the large pool of well-educated young individuals who are constantly being prepared by the universities in the state of Bremen. Since innovation processes focus on people who dare to do something new with courage, creativity and initiative, the transfer of ideas from person to person and an effective transition from the universities into the economy is a key success factor for companies.

Jacobs University Bremen can look back on a successful development as a talent pool for the economy. With their "Jacobs Career Fair" event, companies from Bremen will have an excellent platform to gather international talents. Companies from various different industries have the opportunity to meet these well-qualified and motivated young academics. Students have the occasion to talk to their potential employers and can find out about the entry and career opportunities that are important for their personal growth.

The Jacobs Career Fair is a great opportunity for these young academics and corporate representatives: they can get in touch with each other to exchange about their future perspectives. In light of this, I hope that all the participants of the "Jacobs Career Fair" have interesting discussions and that they establish new relationships with employers.

  
Janina Marahrens-Hashagen

# ALUMNI CAREER TALK

## Jacobs Career Talk Insights for a successful career

 IRC BASEMENT “COSY CORNER”

Explore our special career orientation event organized together with Jacobs Alumni. In an informal setting, Jacobs Alumni share and discuss with students their professional experiences and provide peer-to-peer advice. Students have the opportunity to reflect and to get useful insights on career related questions like:

- What can I do with my qualification?
- Which knowledge and skills do I need to find my dream job?
- How can I be best prepared for my professional life?
- What is important when I choose a career path, a grad school, an employer?
- Which are the expectation of companies or organizations when I am applying for a job entry position?

# STARTUP FORUM

Dear students, alumni and exhibitors,

the entrepreneurship culture is gaining momentum at Jacobs University and we are happy to introduce you to the format of our new Startup Forum during the Jacobs Career Fair: On the one hand, an Alumni Startup Corner consisting of company booths of former Jacobs students with a strong diversity of professional backgrounds. On the other, a Panel Discussion running alongside the fair where students, faculty, alumni and experts are discussing the challenges of entrepreneurship particularly for students.

This exhibitor catalogue aims to provide you with an overview about the panel's schedule and also to present the Alumni Startups within their Startup Corner.

Best regards,

A handwritten signature in black ink that reads "Tilo Halaszovich".

Tilo Halaszovich

# STARTUP FORUM

---

## Deep Web Solutions

**Antonius-Cezar Hegyes, CEO**  
BSc Computer Science, 2017

**Ningxin "Annie" Li,**  
**International Project Manager**  
BA Integrated Social Sciences, 2017

---

"Tony and I met in O-week in our first year at Jacobs, and worked together as Krupp College Office members for two and a half years. The success of our teamwork and friendship at Jacobs built a strong foundation for us as coworkers. In 2018, I joined Deep Web Solutions, the internet consulting company founded by Tony, and began our startup journey."

---

## Corner Office

**Tanja Deisler, Founder and CEO**  
BSc International Logistics Management  
and Engineering, 2010

CORNER OFFICE

---

"At Jacobs, I studied Supply Chain, because I loved the idea of working in a world without borders. I have always had a passion for fashion,

and since my current day time job as a management consultant doesn't really allow me to work in that industry, I decided to take matters into my own hands. I founded CORNER OFFICE, a corporate fashion company catering to women in business. Fueled by my own experience, I know what the current fashion landscape for working women is missing, and I believe in workclothes that make women feel like themselves, empowered and strong."

---

# STARTUP FORUM

---

## Kreatize GmbH

### Daniel Alonso Garcia

B.Sc. in Electrical Engineering and  
Computer Science, 2008

“I studied EECS because I couldn't choose between electronics and IT: I've always had broad interests and found it hard to settle on one thing. Becoming a founder was the only path which allowed me to

build 12 Ikea tables, just before starting bug fixing and right after finishing a financial report to present to investors the next day.”

---

## Nuzzera

### Alexandru Popa, CDO and Co-Founder

(on the right)

BA Physics, 2014, MA Physics 2016

---

“During my final year at Jacobs I started getting more and more interested in Data Science, so, after a detour through Fintech I became a co-founder of

Nuzzera, along with Janine and Marco; at Nuzzera we are tackling the difficult topics of media consumption and media literacy, which we believe are fundamental aspects of a well-functioning society. We create a new revenue source for journalists and a new way of consuming news from established sources but also from independent journalists, while educating the readers regarding information biases.”

---

# STARTUP FORUM

---

## Philosoffee GmbH

**Benjamin Thies, CEO**

B.A. Integrated Social Sciences, 2011

---

"I am one of three co-founders of Philosoffee GmbH. At Philosoffee, we are on a mission to bring the newest trends in coffee beverages to Germany – Cold Brew Coffee. We started out 2.5 years ago and have since then become the number one producer in Germany. Now we need your help to reach more people and get more bars, clubs and restaurants excited for this new delicious way of enjoying coffee.

So if you are looking for a great internship in Berlin – get in touch."

---

## The Connect platform

**Beenish Waris, Co-founder**

BA International Politics and History, 2015

---

"I, together with my two co-founders, have developed a Platform as a Service (PaaS) called Connect Platform. It helps backend developers build their code visually, debug it intuitively and deploy it directly into the cloud. Developers can now build, deploy and manage fully-fledged backend services on the Connect Plat-

form. In the long-run, we aim to become the Airbnb of blocks of codes."

---

# STARTUP FORUM

---

## Sharemac GmbH

**Manuel Kimanov**  
BA International Business  
Administration, 2019

“We have been lucky to create Sharemac with the support of Jacobs University, which undoubtedly helped us a lot in the initial stages of development when it was pretty difficult. Regardless of this, everybody in our team agrees on one thing - managing or working in a startup is the best thing that can happen to a student, not only because the learning curve is exponential, but also because the amount of fun and satisfaction one gets from it is immense.”

## Alfred-Wegener-Institut Helmholtz-Zentrum für Polar- und Meeresforschung

---

Research

Number of employees: 1,200

[www.awi.de/en/work-study](http://www.awi.de/en/work-study)

The Alfred Wegener Institute carries out research in the Arctic and Antarctic as well as in the high and mid latitude oceans. The institute coordinates German polar research and makes available to national and international science important infrastructure, e.g. the research icebreaker “Polarstern” and research stations in the Arctic and Antarctic.

The Institute's research mission is to improve our understanding of ocean-ice-atmosphere interactions, the animal and plant kingdoms of the Arctic and Antarctic, and the evolution of the polar continents and seas. Given the major role played by these regions within the Earth's climate system, global change is a central focus of the research effort at AWI.

AWI collaborates in numerous international research programmes and maintains close contacts with many universities and institutes in Europe and farther afield. It sends scientists to other institutes throughout the world, to other research ships and stations, and invites scientists from other nations to cruises aboard “Polarstern”, as well as to Bremerhaven and Potsdam. About a quarter of those participating in “Polarstern” expeditions are scientists from abroad.

## BARRY CALLEBAUT

---

Food Industry; Cocoa & Chocolate  
Number of employees: 10,000

[www.barry-callebaut.com](http://www.barry-callebaut.com)

With annual sales of about CHF 6.7 billion in fiscal year 2015/16, the Barry Callebaut Group is the world's leading manufacturer of high-quality chocolate and cocoa products – from sourcing and processing cocoa beans to producing the finest chocolates, including chocolate fillings, decorations and compounds. The Group runs more than 50 production facilities worldwide and employs a diverse and dedicated global workforce of close to 10,000 people. The Barry Callebaut Group serves the entire food industry, from industrial food manufacturers to artisanal and professional users of chocolate. The Barry Callebaut Group is committed to make sustainable chocolate the norm by 2025, to help ensure future supplies of cocoa and to improve farmer livelihoods. It supports the Cocoa Horizons Foundation in its goal to shape a sustainable cocoa and chocolate.

The Barry Callebaut Group offers a two-year Graduate Trainee program, which enables graduates to start an international career at Barry Callebaut, divided into 3 assignments of which at least one is planned outside your home base country. The program starts each year in September. Bright, young talents, like you are given a truly global perspective and the opportunity to gain deep expertise in a chosen area of specialization. With strong ambition and high performance, you will be able to grow, develop and progress with Barry Callebaut into a challenging position where your expertise is valued and entrepreneurship is fostered. The program is designed to help you gain functional expertise which transcends across geographies.

Using our own technology, we clean conveyor systems as a service.

Number of employees: 2

[www.brige.de](http://www.brige.de)

We developed a technology to clean conveyor systems using only water and air. We offer B-CLEAN® technologies as a service to varied customers mainly in the area of surface technology, automotive and food and beverage industries. We do business in Germany, Austria, Belgium, Netherlands, Czech Republic. Our focus is to increase our strong portfolio of returning customers, offering services our clients need in order to increase overall production hygiene and keep quality levels steady at highest levels. We accomplish this using state of the art methods and adhere largely to standards set forth in the EFQM and ISO 90001. In addition, we developed a strong network of partners enabling us to move quickly in order to serve our client's needs. We frequently exhibit our key technologies at trade shows. Naturally, we invest in our future by offering 3 year apprenticeships and are officially licensed to do so by the chamber of commerce of Bremen and Bremerhaven. The companies headquarter is in Hamburg and our workshop and supporting services, such as sales are located in Bremen-Blumenthal.

### Working together worldwide

As a provider of international cooperation services for sustainable development and international education work, we are dedicated to building a future worth living around the world. GIZ has over 50 years of experience in a wide variety of areas, including economic development and employment, energy and the environment, and peace and security. The diverse expertise of our federal enterprise is in demand around the globe, with the German Government, European Union institutions, the United Nations, the private sector and governments of other countries all benefiting from our services. We work with businesses, civil society actors and research institutions, fostering successful interaction between development policy and other policy fields and areas of activity. The German Federal Ministry for Economic Cooperation and Development (BMZ) is our main commissioning party.

### Core competence

For more than 30 years, capacity development has been one of the key services delivered by GIZ and its predecessors. Around the globe, we advise people and organisations on learning and change processes.

GIZ supports people in acquiring specialist knowledge, skills and management expertise. We help organisations, public authorities and private businesses to optimise their organisational, managerial and production processes. And, of course, we advise governments on how to achieve objectives and implement nationwide change processes by incorporating them into legislation and strategies. The political and social framework plays a crucial role in ensuring reforms are effective and sustainable. Without an enabling environment, changes remain superficial and have no real impact in the medium term.

At GIZ, capacity development is about strengthening partners and tapping potentials. This is the key to sustainable development.

## ESMT Berlin

---

Business School / Higher Education,  
MSc, MBA, EMBA  
Number of employees: 220

[www.esmt.org/degrees](http://www.esmt.org/degrees)

ESMT Berlin – European School of Management and Technology, located in the heart of Berlin, is a private business school founded by 25 multinational corporations. The school's expertise focuses on the development of entrepreneurial leaders with a global focus on social responsibility and the management of technology. ESMT is one of the top ranked business schools in Germany with a global network of alumni in over 50 countries. ESMT is triple-accredited by AACSB, AMBA, EQUIS and FIBAA and has the right to grant PhD's. As the most international business school in Germany, over 80% of ESMT's faculty members have a non-German background and were educated at some of the most prestigious business schools and universities.

ESMT offers three degree programs: A two-year Master's in Management (MIM); a one-year Full-time MBA and a part-time Executive MBA (EMBA). The MIM is a dynamic program for recent graduates offering two tracks: Innovative Management and Quantitative Business. Depending on the track, students can choose one of four specializations: Business Analytics; Finance & Investments; Entrepreneurship & Innovation or Global & Digital Strategy. All ESMT programs benefit from close relationships with ESMT's corporate network and founders.

## European Institutions

---

European Institutions (European Parliament, Commission, European Court of Justice and more). Job opportunities for economists, lawyers, linguists, translators, social scientists, political scientists, natural scientists and more.

Number of employees: 43,000

<https://epso.europa.eu>

The European Union employs approximately 43,000 people from 28 member states. About 32,000 employees are working at the European Commission, 7500 at the European Parliament and 3,500 at the Council. There are several entry levels when it comes to working for an EU institution. The AST (Assistants) with no university degree required and AD (Administrators) with a Bachelor degree required.

In general, if one wants to apply at a EU institution, they do so via <https://epso.europa.eu>. The selection procedure consists of a so-called “concours” (online application, assessment center, job interview). Working for the EU offers a lot of advantages: an international work environment the possibility to shape Europe together, a good work-life balance, family support and many other benefits.

## Fricke Holding GmbH

---

E-commerce & international trade in:  
agricultural machinery and spare parts  
Number of employees: 2,346

[www.karriere.fricke.de](http://www.karriere.fricke.de)

### **Passion for service and technology**

The Fricke group is one of the largest private enterprises in the agricultural machinery industry and is very successful in many areas today. In the course of its almost 100-year history, the family company has developed from a traditional agricultural machinery dealer to a successful international wholesaler for agricultural machinery, garden technology, commercial vehicles and spare parts. With 2,449 employees - spread over 56 locations in 21 countries - we are working together to further expand our market position.

### **Digitalisation and e-commerce**

As a wholesaler of original parts and identparts for all brands throughout Europe, we have been operating an e-commerce platform since 2004 and are continuously developing it further, in order to be able to offer our customers an unrivaled product range tailored to their needs. 95 percent of the orders are placed online, and the webshop is mainly managed by our own development team in Bremen.

### **Our benefits**

We work in several agile teams using trend-setting technologies according to modern principles. The working environment is characterized by flat hierarchies, short decision-making paths and communication on eye level. In addition, there are benefits such as modern workplace equipment, flexible working hours and exclusive events.

## Hertie School of Governance

The Hertie School of Governance in Berlin prepares exceptional students for leadership positions in government, business, and civil society. Interdisciplinary and practice-oriented teaching, first-class research and an extensive international network set the Hertie School apart. Our graduate programmes attract a talented student body from diverse national and disciplinary backgrounds — united by a desire to make a difference and to contribute to better policy-making around the world.

The Master of Public Policy (MPP) programme is for individuals who want to understand and get involved in public affairs and learn analytical and managerial skills. Courses in economics, political science, statistics, public management and law give students a strong interdisciplinary foundation. Participation in a project course, usually taught together with a public policy institution, confronts students with the challenges of a real-world project. Students choose between two concentrations: policy analysis or management and organisation.

The Master of International Affairs (MIA) programme prepares students for positions requiring a profound understanding of today's global challenges in government, international organisations, business and civil society. Students attend courses in global governance, international economics, international law and security policy. A practice course in International Affairs supplements the curriculum. Students also choose between two concentrations: finance and trade or security and sustainability.

## Institute for Chemistry and Biology of the Marine Environment (ICBM)

Carl von Ossietzky University Oldenburg

The Institute for Chemistry and Biology of the Marine Environment (ICBM) at the University of Oldenburg is an interdisciplinary research institute, dealing with fundamental and applied issues in marine and environmental research. The ICBM aims at understanding the value of marine environmental systems through close cooperation of the various scientific disciplines (chemistry, biology, physics, modelling) of its research groups. The research focuses on marine biogeochemical cycles and energy fluxes in the water and sediment and at the boundary layers between habitats and water masses as well as the functional role of marine biodiversity.

The ICBM enables an interdisciplinary and research-oriented training of future marine scientists by closely involving them in the institute's research activities. The interdisciplinary study courses Environmental Sciences (Bachelor) and Marine Environmental Science (Master) offer a broad spectrum of fundamental scientific knowledge, training in modern methods of marine research and high flexibility in various study paths. More focused teaching activities are embedded in the international study course Microbiology as well as the Master programmes Marine Sensors and Environmental Modelling. The promotion of young researchers has a high value at the ICBM. The ICBM offers PhD students excellent working conditions and enables them to participate in a coordinated graduate training as part of a PhD programme "Environmental Sciences and Biodiversity".

## International Max Planck Research School of Marine Microbiology (IMPRS MarMic)

The International Max Planck Research School of Marine Microbiology (MarMic) is an MSc/PhD graduate program for highly qualified and motivated national and international students. MarMic is a joint program of the Max Planck Institute for Marine Microbiology, the University of Bremen, the Alfred Wegener Institute for Polar and Marine Research, and the Jacobs University Bremen.

MarMic teaches students to take an interdisciplinary approach to the understanding of marine prokaryotic and eukaryotic microbiology, offering training in physiology, ecology, evolution, molecular biology, bioinformatics, and other related subjects.

The MarMic concept is unique: we are educating a new generation of marine scientists, and providing them with the tools to better understand microbial life and the matter in which it affects our biosphere. MarMic students are trained to think globally and to choose from both holistic and reductionistic research approaches. The breadth of theoretical and practical experiences at MarMic enables students to address questions ranging from biogeochemistry to genomic analysis, from single-cell interactions to behavior in mixed communities. These abilities make MarMic students attractive scientists for international research teams, institutes, universities, and industry.

## Kaesler Nutrition GmbH

---

Kaesler Nutrition GmbH is a globally-active company that manufactures and distributes food and feed additives for quality nutrition. Number of employees: 155

[www.kaesler.de](http://www.kaesler.de)

The history of Kaesler Nutrition GmbH stands for more than 50 years of competence. Our portfolio comprises essential components, such as vitamins and amino acids, in addition to specialities, e.g. enzymes, natural antioxidants and flavours, as well as drinking water applications for on-farm use. Our concepts of feed and food additives are effective modules for economic viability, emission reduction, and efficient use of resources in nutrition. Over 150 members of staff are working on this challenging task at our headquarters in Cuxhaven and in our global representations and are thus continuing decades of tradition as a pioneer in adding true value to nutrition. From uncompromising raw material quality via our specialist knowledge in application-oriented formulations for feed and food manufacturers, through to situation-specific use: our customers benefit from our wealth of experience and know-how.

Manufacturing Services

Technology

Tech Startup

Industry 4.0

Number of employees: < 35

<https://kreatize.com/career>

Tagline: The smartest way to buy custom parts.

KREATIZE is the leading platform for custom part procurement.

KREATIZE is a B2B platform for ordering custom parts and prototypes in an easy and fast way. Intelligent software supports the customer in finding the appropriate manufacturing process and material that best fit the needs of their individual project. Then, the optimal supplier is selected from KREATIZE's global manufacturing network in order to connect customer and supplier afterwards.

The cumbersome and tedious search for and selection of a supplier, characterized by complexity, uncertainty and inefficiency, is a thing of the past. The Smart Projekt Realizer developed by KREATIZE enables customers to turn their visions into reality in only four easy steps: Upload of their 3D-CAD-model, matching of manufacturing process and material, supplier selection and shipping of their completed custom part.

The target of KREATIZE's Smart Projekt Realizer is to optimize the inefficient process of custom part and prototype procurement for small and medium-sized enterprises and to reduce the transaction costs for customers and suppliers alike.

## neuland – Büro für Informatik GmbH

### Welcome to neuland!

As a software development company we build online shops for companies such as Breuninger, Bonprix, Douglas, Frankonia, Höffner, Fricke, Klingel, Manufactum or Obi.

We implement ambitious features for our customers, we consult them and realize functional requirements. The willingness to improve and learn is deeply anchored in our corporate culture. Therefore, we continuously check new trends as well as technologies and include the best of it in our decision-making processes.

We trust in self-organized teams which are focused on the needs of each customer. Our complex projects are characterized by multiple interfaces and contact persons. You will get enough time to get to know your team and to orient yourself.

First of all, there is the coding dojo. Furthermore, the pairing with your team members as well as the test driven design are important. You will receive the opportunity to further develop personally during your working time. You will get the opportunity to participate in research projects and conferences or to learn new programming languages. Your language skills should be on a B1 level.

You are most welcome, to bring in your skills and knowledge in our team as full time employee as well as a student employee. Get to know neuland! We are looking forward to welcoming you at our stand on the career fair.

ca. 17,000 in Germany

[www.roche.com/de/careers/country/  
germany.htm](http://www.roche.com/de/careers/country/germany.htm)

Roche Diagnostics GmbH is the largest German subsidiary of the leading research-based healthcare company Roche, headquartered in Basel, Switzerland.

Both of its sites at Mannheim and Penzberg are located in award-winning biotechnology regions. Globally, more than 90,000 Roche employees including 11,000 within Roche Diagnostics GmbH, are engaged in pioneering areas of healthcare.

Important products for in-vitro diagnostics are manufactured in Mannheim, Roche's third largest site worldwide. The site also occupies a leading position within the Roche Group with respect to therapeutic products. In addition, Mannheim is home to the global logistics hub of Roche Diagnostics, which supplies products to around 170 countries each day.

With research, development, production, and logistics, Roche Diagnostics GmbH forms part of the value added chain and helps Roche products reach patients all over the world.

In Penzberg near Munich, Roche Diagnostics GmbH operates the largest centre of biotechnology research, development and production within the Roche Group in Europe. Penzberg is the only site within the Roche Group where both business divisions of Pharma and Diagnostics conduct research and development and carry out production activities, thus covering the entire spectrum from research all the way to the patient.

B2B Platforms / Construction industry /  
Telematics / Business ecosystems / Software  
development / Shareconomy  
Number of employees: 10

[www.sharemac.de](http://www.sharemac.de)

Sharemac is a unique, professional online platform, through which construction companies and private users can exchange equipment through lending and renting. Entirely inspired by the mega trend of Shareconomy, Sharemac provides a practical solution to supply chain breakdowns, such as project deadlines obstructed by broken machines; improves companies' equipment underutilization; allows owners to generate cash by renting the equipment; and ensures a lower renting price for renters. Every company disposes of an individual equipment database on the platform, which allows standardization of the equipment descriptions and parameters, and creates a universal catalogue for all companies. With just one click, every machine can be put online for lend, and generate additional capital for its owner, who in turn determines the renting price. This makes Sharemac very flexible, fast and easy to use. Additionally, the platform provides a tool, which makes the equipment management and scheduling more efficient and effective. With all its features and tools, Sharemac is a great platform to use for internal and external purposes.

## The Connect Platform

Connect is a visual programming framework for Backend Development based on asynchronous logic. As part of the framework, we offer Platform as a Service (PaaS) to allow developers to visually build their microservices, from scratch, with just a few clicks. What does Connect offer? Using our platform, you can:

- Build, test and debug intuitively using Connect Platforms visual representation
- Deploy and Scale seamlessly: focus on building your microservices and let Connect take care of deployment and scaling
- Add your own javascript codes easily to the platform and use packages developed by other people to connect to database, send emails or even manage docker containers
- Connect your micro services effortlessly: integrate your micro services just as easily as calling another function. Integration capability is not limited to services built with connect!

Check out the Connect Platform here:

Engineering, Design, Fabrication, Installation  
and Maintenance of Texlon® ETFE foil systems  
all around the world

Number of employees: 181

[www.vector-foiltec.com](http://www.vector-foiltec.com)

With transparent roofs and facades made of TEXLON® ETFE, the company Vector Foiltec has made a major contribution to setting new standards in 20th and 21st century architecture.

As the world market leader in architectural foil construction and inventor of the Texlon® ETFE system, we have already completed over 1,500 international projects. Our system shapes stadia constructions, atria, shopping centers, zoos and garden parks, public buildings, swimming pools, schools and universities all over the world.

Our technology includes a wide range of fluoropolymer films that can be processed in a variety of ways. Whether as a one-layer or multi-layer system, Texlon® ETFE produces high-performance building envelopes with an outstanding eco-balance. ETFE's high tensile strength, resistance to tearing, excellent light transparency and low flammability is ideally suited for all fields of application. Vector Foiltec invented and pioneered the use of Texlon® ETFE over 35 years ago, and is the only company in the world whose core business is ETFE. Our team of experts have been responsible for all major technical innovation in the field. Through extensive investment in Research & Development and a commitment to superlative quality and performance we continue to be the global market leaders.

With a total of 18 branches and two production sites we are represented in countries such as Australia, the USA, China and the United Kingdom, combining local knowledge with global expertise.

## VOCO GmbH

---

Dentistry  
Number of employees:  
440 in Germany, 390 abroad

[www.voco.dental](http://www.voco.dental)

With tremendous growth and outstanding product quality, the family-run dental enterprise VOCO has become one of the leading manufacturers in the industry. VOCO offers brand-name products, in the fields of preventive, restorative and prosthetic dentistry, which are held in high esteem both in Germany and abroad, often leading the way in the respective fields thanks to their innovative approaches and solutions. VOCO carries out its research, development and production at company headquarters in Cuxhaven, Germany, which has expanded steadily since the company was founded.

For academics from a diverse range of disciplines, VOCO offers career options in the scientific, technical or business management divisions of the company.

As an internationally renowned specialist in dental materials, VOCO markets its over 100 products in more than 100 countries. An over 400-strong workforce in Germany and a further 390 country-based expert dental consultants abroad contribute to its global success. VOCO maintains companies in the USA, Canada, Brazil and Australia as well as local representative offices in Shanghai and Istanbul.

The future of dentistry is digital – this is why VOCO has chosen to establish an additional base in Mannheim, where innovative spirit meets technical expertise: A dedicated team of researchers devote their skills to developing intraoral scanner technology based on digital holography.

The scientific team behind this is made up of physicists and software developers, as well as electronic engineers and production engineering experts. The functional specifics of the scanner represent only one aspect of the development process, the other being its integration into the digital workflow of the dental practice. VOCO encourages staff to implement their own ideas and play an active part in the creation of something new.

## Yelp GmbH

---

Internet, IT  
Number of employees: 5,000

[yelp.com/careers](http://yelp.com/careers)

Yelp is a website and mobile app that makes it easy for users to connect with awesome local businesses. Founded in 2004, Yelp has taken root in countries across the globe as the leading local guide for real word-of-mouth on everything from boutiques and mechanics to restaurants and dentists.

Today, Yelp has 109M+ unique mobile visitors and 69M+ unique desktop visitors every month. Keeping things running smoothly requires the best and brightest in the industry. Our engineers come from diverse technical backgrounds and value open source and creative problem solving. They write tests, review code, and push daily to keep Yelp the richest source of local data out there.
