

Geochemical Seminar ICBM (WS 2016/2017)

Tuesday 4:15-5:45 pm - W15-1-146

Scientific Presentations

- 08.11.2016** **Gonzalo Gomez** (Marine Geochemistry)
Geochemical transformations of dissolved organic sulfur
- René Neuholz** (Inorganic Geochemistry)
Submarine groundwater discharge - a comparison study of southern Monterey Bay, CA and the German North Sea (Master thesis)
- 22.11.2016** **Julia Kirchner** (Inorganic Geochemistry)
Modeling impacts of artificial limestone weathering on marine carbon chemistry
- Maricarmen Igarza Tagle** (Marine Geochemistry)
DOM dynamics in the coastal upwelling system off Central Peru
- 06.12.2016** **Irka Schüller** (Organic Geochemistry / Senckenberg am Meer)
Late Quaternary shift in southern African rainfall zones: new reconstructions from Kalahari salt pans
- Claudia Ehlert** (Marine Isotope Geochemistry)
Stable silicon isotope signatures of marine pore waters – biogenic opal dissolution versus authigenic clay mineral formation
- 20.12.2016** **Bianca Liguori** (Marine Isotope Geochemistry)
Silicon biogeochemical cycling in the Arctic Ocean
- Hannelore Waska** (Marine Geochemistry)
Metal interactions in the subterranean estuary: Implications for trace metals and DOM mobility
- 17.01.2017** **Nur Ili Hamizah Mustafa** (Sea Surfaces)
Extracellular carbonic anhydrase in the Pacific Ocean
- Lukas Belz** (Organic Geochemistry)
Climate dynamics of the western Kalahari since the Late Pleistocene: Insights from salt pan sediments
- 24.01.2017** **Sebastian Storey** (Marine Geochemistry)
TBA (Master thesis)
- Corinna Mori** (Inorganic Geochemistry)
TBA (Master thesis)
- 31.01.2017** **Matthias Rehbein** (Marine Isotope Geochemistry)
Rare Earth Elements in the South Pacific Subtropical Gyre (Master thesis)
- René Jarling** (Organic Geochemistry)
TBA
